

Studying with The Business School (UK)

... LEARN WITH US ...

Welcome to The Business School UK's Virtual Learning Environment. Our passion is training and development; sharing our knowledge, and seeing our students succeed. We believe that personal development is important to everyone. We also understand that it's not always possible to "drop" everything to study. This is one of the reasons we created our own Virtual Learning Environment (VLE).

By taking a course online you are able to:

- Study in your own time
- Study at your own pace, to your own schedule
- Study anywhere (you can study online, save the documents to your PC, or print them)
- Receive timely, expert tutor support

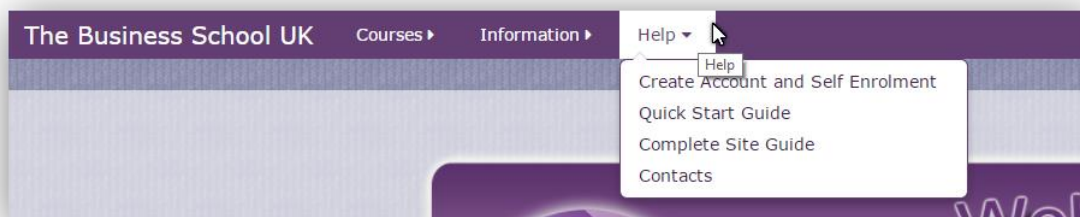

Help and Information

We understand that the thought of studying online can be daunting. However, it need not be. Studying with us means you will never be alone. We are on hand to provide guidance with all aspects of your course. This starts with providing advice, if you need

it, on selecting the right course and units for you, continuing with our ongoing expert tutor support all the way through until you finish your course.

To study online you need to have access to the internet, but as our course materials can be downloaded and/or printed you don't need access all of the time. Once you have purchased your course you will have access to everything that you need to complete it. These resources can include written materials, reading lists, presentations, articles and exercises.

Our VLE is simple and intuitive to use. Navigate to your course and follow the instructions on the courses introduction page. A full site guide is provided, but if you did require any assistance our friendly and knowledgeable technical support is on hand to help you. You will find information on how to contact us as well as a selection of user guides under the **Help** tab. Further information including a study guide and our policy documents can be found under the **Information** tab.

Learning online gives you the opportunity to create your own schedule.

Our expert tutors are also not tied to a geographical location, which means we can provide you with the best support when and where you need it.

Company Benefits

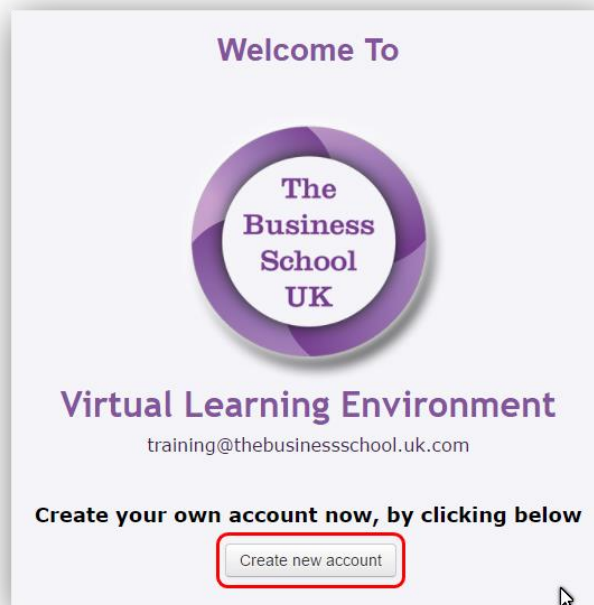

Companies benefit too from being able to offer their employees flexible studying. For companies who are situated in more than one location, online learning also provides the option for the same training to be offered to all employees.

Studying online is a cost effective way to develop the right skills for today's workplace. These skills can, for example: improve career prospects, grow personal capabilities, improve effectiveness and give increased confidence and self-worth. For companies, offering the right training can also attract the right employees to come and work for you and help retain them.

Get started

Get started on our VLE by creating your account. Information on how to do this is found under the **Help** tab. If you wish to pay by PayPal you can get started straight away as soon as you've paid. You'll have instant access to all the course materials and information you need in order to get started. We offer other payment options including bank transfer, check and invoice to your employer.

If you wish to discuss any aspect of studying with us or the payment options, please contact us at training@thebusinessschool.uk.com.

Get started by creating an account [HERE](#)

Bespoke Courses

Our VLE is a dedicated platform for all our online courses. We are constantly working to provide more courses in this flexible format. This includes developing course and provision to meet organisational needs. If you have dedicated training requirements, we are more than happy to discuss. If you would like more information on either our standard or bespoke courses, get in touch [HERE](#).

We wish you all the best with your studies, The Business School (UK).

**Our passion is training and development;
sharing our knowledge, and seeing our students succeed.**
